## EPIR | E-Procedure of Institutional Recognition of Foreign Higher Education Documents

Office 365 tools can improve procedure for recognition of foreign higher education documents  
University of Split

It will be created a Sharepoint communication site with University of Split's documents (legal regulations, approval process flow diagram...) and on-line form with possibility to upload documents.

Administrative staff, which process requests, will create folders for each individual subject and, depending on the type of study program, grant access rights to authorized professors or employees of the Agency for Science and Higher Education.

The received request will change statuses, depending on the stage of processing, and a return notification will be sent to the person who sent the request.

This solution did not achieve automation of the process, but it is better than the existing one where everything is done on paper.
